Professional Wine Bins

Depth 41 / 50 / 61 (2 x 30,5) cm

Exterior Dimensions:
Width 52,5 / 105 cm,
Height 59 / 79 / 110 cm
Interior Dimensions:
Width 42,5 / 95 cm,
Height 41 / 61 / 92 cm
Height:
59 / 79 / 110 / 130 / 150 / 161 / 181 / 212 / 230 cm
etc. (Exterior Dimensions)

Professional wine bins

VR Professionnel elements are produced from a combination of white cement and powdered stone obtained from the world famous Comblanchien quarries located in the Côte de Nuits, Burgundy, France. The simple but perfectly arched design combined with a modular bin concept enables the VrProfessionnel to be installed almost anywhere, be it in an old or a new wine cellar, in a restaurant, or in business establishment, or at the winery, etc.

Standard dimensions facilitate bottles storage within the bins. The choice of three different depths allows various bottle types to be stored in single, double, or triple layers. Bins can be further subdivided with the use of removable shelves to form compartments capable of holding 5 or more bottles. The weight as well as the density of the material used to fabricate the bins stabilises both the temperature and the humidity around the bottles thereby guaranteeing an optimal aging environment for your wine.

Depth 41 cm

Private Cellar: Single row stacking for all bottle types
Reversed staking of Burgundy type bottles
Simple storage of Magnums
Professional Usage: Reversed stacking of Burgundy type bottles

Depth 50 cm

Private Cellar: Single or multiple row stacking for all bottle types
Professional Usage: Reversed stacking of Bordeaux, Alsace and Champagne type bottles

Depth 61 (2 x 30,5) cm

Private Cellar: Simple storage for two sided bin access
Double stacking of Magnums
Triple reversed stacking of Burgundy type bottles
Professional Usage: Simple storage for two sided bin access
Triple reversed stacking of Burgundy type bottles
Reversed stacking of Bordeaux and Burgundy Magnums
2 X reversed stacking of half bottles

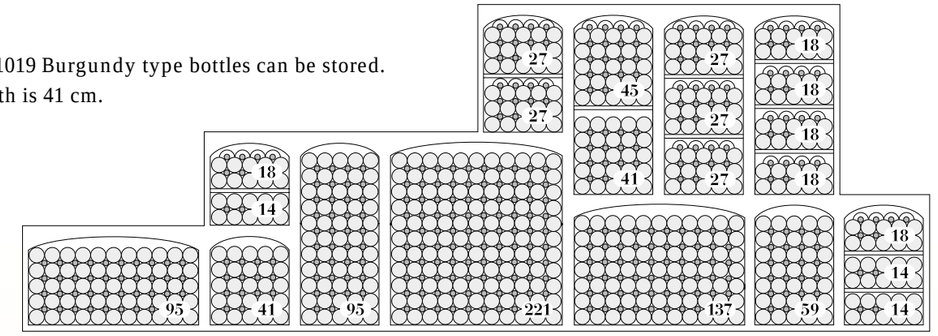
Each bin can be subdivided with the use of removable shelves.

Storage Capacity

9 to 342 bottles per bin depending upon its' dimensions, the number of removable shelves and the type of bottles to be stored.

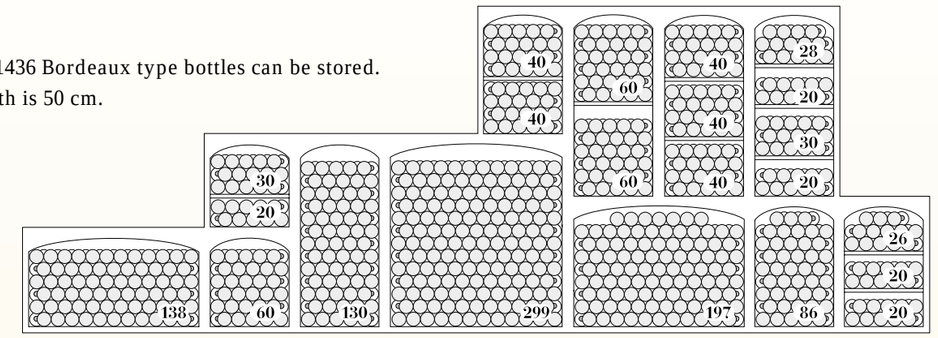
In this example, 1019 Burgundy type bottles can be stored.
The uniform depth is 41 cm.

41



In this example, 1436 Bordeaux type bottles can be stored.
The uniform depth is 50 cm.

50



In this example, 1606 Burgundy type bottles can be stored.
The uniform depth is 61 (2 x 30,5) cm.
